

PromptShield AI - Security Report

Generated: 2026-08-08 01:28:31 UTC

Target: Unicode Zero-Width & Homoglyph Attack Scan

Risk Score: 60 / 100

Severity: HIGH

Detected Vulnerabilities (3)

1. [HIGH] OBF-001 - Zero-Width / BiDi Unicode Control Character Injection

Category: Obfuscation | Line: 2

Evidence: Found 3 hidden unicode control characters

Remediation: Strip non-printable Unicode characters (U+200B-U+200D, U+FEFF, U+202E) before processing prompt content.

2. [HIGH] OBF-002 - Cyrillic / Confusable Homoglyph Substitution

Category: Obfuscation | Line: 3

Evidence: Detected 4 visually ambiguous homoglyphs in text line

Remediation: Normalize Unicode strings using NFKC decomposition and convert homoglyphs to standard ASCII representation.

3. [HIGH] CLS-001 - Semantic Instruction Override / Safety Evasion Pattern

Category: Classifier | Line: 1

Evidence: Adversarial semantic intent detected across keyword clusters: [ignore, rules; pr

Remediation: Audit prompt semantics for indirect jailbreak intent, multi-shot roleplay tricks, or constraint evasion attempts.
